Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-IL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:
Engineering knowledge,Problem analysis, Design/development of solutions,Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World,Ethics, Individual and Collaborative Team work,Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	14	Name of Student	MANJIRI BHAISE

Practical Number	4-A
Course Outcome	**To understand and apply JavaScript loops, conditional statements, and form validation for developing interactive and user-friendly web forms.**
Aim	**Aim** **To create a registration form and use JavaScript loops, conditional statements, and form validation to validate user inputs and display appropriate error messages.**
Problem Definition	**Introduction to JavaScript (Loop, Conditional Statement) and Form Validation.** **Sample Problem Statement: Build a registration form (name, email, password, phone number) and write JavaScript to validate all fields on submit, displaying inline error messages**
Theory (100 words)	**JavaScript is a scripting language used to make web pages interactive and dynamic. Conditional statements such as if, else if, and else are used to execute code based on specific conditions. Loops such as for, while, and do...while repeat a block of code multiple times. Form validation checks whether the information entered by a user is correct before submission. In a registration form, JavaScript can validate the name, email, password, and phone number. It can check empty fields, valid email format, password length, and phone number format. Inline error messages are displayed near invalid fields to guide users.**

Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution (100 Words)	**1. Create an HTML registration form with fields for Name, Email, Password, and Phone Number.** **2. Add or <small> elements beside each field to display error messages.** **3. Write JavaScript using if-else conditional statements to check each input.** **4. Use loops where required to process or validate multiple fields.** **5. Apply validation rules such as:** **o Name should not be empty.** **o Email should have a valid format.** **o Password should meet the minimum length.** **o Phone number should contain valid digits.** **6. Use the form's submit event to run the validation.** **7. Display inline error messages for invalid fields.** **8. Allow form submission only when all fields are valid.**

	Output: 
Link of student Github profile where lab assignment has been uploaded	https://github.com/manjiribhaise
Conclusion	**The registration form was successfully created using HTML, CSS, and JavaScript. JavaScript conditional statements and loops were used to validate the user's input. The form checks the name, email, password, and phone number and displays inline error messages for invalid entries. This validation helps ensure that users provide correct and complete information before submitting the form.**
Plag Report (Similarity index < 12%)	**1. The submitted work was checked for similarity with existing sources. The similarity index is less than 12%, indicating that the content is largely original and independently prepared. Any minor similarities may be due to commonly used technical terms, programming syntax, or standard explanations related to JavaScript and form validation.**
